FX® MARKING and NON-MARKING CARTRIDGES

- Used with FX® personal protective equipment, including mandatory head, throat and groin protection

TECHNICAL SPECIFICATIONS
SUPERIOR FX® MARKING COMPOUND

THE FX® MARKING AMMUNITION IS KNOWN AS «THE WORLD’S MOST REALISTIC CLOSE-RANGE COMBAT TRAINING SYSTEM»

SAFEST NON-LETHAL PROJECTILE TECHNOLOGY THAT ENSURES OPERATOR SAFETY WHILE MAXIMIZING OPERATIONAL PERFORMANCE

SIMUNITION® MARKING COMPOUND IS UNMATCHED IN THE INDUSTRY

-Water soluble marking compound
-Marking imprint highly visible
-Excellent washability in cold water
-Cost effective for infrastructure and equipment maintenance
FX® PROJECTILE TERMINAL EFFECT

/ FOR ALL CALIBERS, THE PATENTED FX® PROJECTILE DESIGN is unique in the industry and engineered to maximize accuracy down range and provide unsurpassed safety to the operators.

/ FOR NON-LETHAL TRAINING AMMUNITION, a trade-off will always exist between muzzle velocity and impact safety.

/ ACCURACY is maximized down range by achieving higher muzzle velocities than our competitors while remaining safe on impact with a mushrooming soft polymer projectile.

/ UNSURPASSED OPERATOR SAFETY is achieved by a series of innovative design features that are activated upon initial contact with target.
IN FLIGHT
Projectile is spin stabilized up to effective engagement range.

ENERGY DISSIPATION ON IMPACT BY DEFORMATION
Upon initial contact, impact energy is partially transformed into projectile deformation energy; hence slowing down the projectile.

MARKING COMPOUND EXPELLED
Deformation of the FX® projectile expels the marking compound through the star shaped openings.

LARGER PROJECTILE DIAMETER FOR NON-PENETRATION SAFETY
Final impact energy is then transferred on a much larger impact diameter that serves two purposes:
/ Distributes impact force over a larger surface
/ Increases diameter of projectile to ensure non-skin penetration performance
