- Lightweight material
- Highly comfortable, allows easy movement

TOP OF GLOVE (material)

(under the rubberized protective pad):

Breathable Perforated Fabric (Neoprene like)

The fabric used on the back side of the glove has the following characteristics:

- Highly breathable with perforated small holes to maximize air ventilation
- Durable
- Soft & comfortable
- Lightweight

Most Recent Glove Improvements

1: Rubber Protection has been added on Finger Tips and index finger to reduce pain penalty from a direct hit with Simunition[®] training ammunition

4: Radius and curvature have been added to the top protective rubber pad to prevent premature breakage and tear

2: Air ventilation openings have been added to increase ventilation and comfort and to allow an improved weapon grip

3: Rubber protection has been added to the thumb to reduce pain penalty from a direct hit with Simunition[®] training ammunition

Using the Sizing Gauge

1. Place your right hand as shown with your index finger against the black line.
2. The measurement on the horizontal sizing gauge that follows the right side of your hand is your approximate glove size.
3. Double-check your size by using a tape measure and the chart below.
4. This is a general guide only.
