

SIMUNITION®

CONVERSION KIT 5.56MM HK416 & VARIANTS

TRAINING FOR THE REAL WORLD®

SIMUNITION® CONVERSION BOLT

The Simunition® conversion bolt allows the FX® Marking Cartridges and SecuriBlank® Cartridges (Loud and Quiet) to be fired safely from the user's own service weapon. This operator-installed kit diminishes the possibility of firing live lethal ammunition and ensures the proper operation and cycling of the weapons through a direct blow back action.

The conversion kits are an integral part of the FX® training system along with the FX® Marking Cartridges, the FX® Personal Protective Equipment and the Simunition® Scenario Instructor Safety Course.

Weapons can be converted back to operational status once training is over. The kits are made from the same type of high-strength materials as duty weapons and are designed with various safety features to diminish the possibility of firing live lethal ammunition.

TECHNICAL SPECIFICATIONS

Type	Conversion Bolt for HK416/C7/C8/M4/M16/SIG 516
Caliber	5.56mm
Function Mode	All firing modes
Color	Blue marking for visual safety
